

The Natural Numnah Company

The Natural Numnah Company provides made to measure sheepskin numnahs at a reasonable price. A real sheepskin numnah is warm and comfortable for your horse, a real boon for cold backed horses. It wicks away moisture, keeping the skin dry and preventing discomfort.

For the show horse a made to measure numnah is the ultimate smart accessory. It is also useful for minimising side to side roll or forward movement on very round ponies. Even if the saddle fits well the very shape of the pony may make it roll.

We also make to measure numnahs for side saddles. We make our numnahs to measure for your horse or pony and their saddle so that you always have a perfect fit. They can be washed by hand or a cool machine wash and will last, if well cared for, for many years.

The finest available quality skins are used for our Supreme range. The pile is dense and hard wearing but very soft. A range of colours is available including dark brown, cream and natural. The colour of your numnah can either match or contrast with your horse. Our products are machine washable.

Our Standard range is made from top quality skins, usually British and have a dense but slightly less soft pile. This range is available in dark brown and natural.

Prices in this range start from just £59

For other prices see our price list and full colour brochure, together with actual skin samples, which allows you to make the right choice for your horse.
